ADAM R KOLT

SENIOR BUSINESS ANALYST

714-273-2300 | adam.r.kolt@gmail.com | Orange, CA | in/AdamKolt | Portfolio | US Citizen Open to Travel/Relocate

SUMMARY

Senior Business Analyst and Product Owner adept in driving high-stakes digital transformation, AI-driven innovation, and revenue growth across telecom, government, and technology sectors. Expert in translating complex business needs into actionable user stories, MVP definitions, and outcome-based roadmaps with structured requirements, process modeling, and data-driven insights.

TRACK RECORD

Scaled a national platform **by 10x ($5.8M to $57.8M)** leading to acquisition, architected **first-to-market data monetization** products while navigating **strict privacy regulations**, and launched a highly successful **B2B Telecom self-service App**.

EDUCATION

Master of Business Administration (MBA)
Marylhurst University - Portland, OR

B.S. Electrical Engineering
Qatar University

CERTIFICATION

Stanford Certified Project Manager
Stanford University

Project Management Professional
Project Management Institute

KEY SKILLS

PRODUCT & DELIVERY

- Requirements Elicitation
- Epics & User Stories (INVEST)
- Product Roadmap, MVP
- Backlog Management & Value-Based Prioritization
- Agile Delivery (Scrum, Kanban, Sprint Planning & Execution)
- SDLC, UAT, & Release
- Compliance by Design & Regulatory Alignment
- Customer Journey Mapping

BUSINESS & TRANSFORMATION

- Stakeholder Engagement & Executive Alignment
- As-Is / To-Be, Gap Analysis – BPMN/UML
- Operational Excellence & Continuous Improvement (SOPs, Standardization)
- Business Case Development, CBA & ROI Modeling
- Value Stream Mapping & Lead-to-Cash Optimization

DATA & PERFORMANCE

- Data Analysis & Insights (SQL, Excel, BI Tools, UML&ERD)
- KPI Definition, Forecasting & Performance Tracking
- Data Visualization & Reporting (Power BI, Tableau)
- Data Governance & Monetization
- AI Integration (RAG, MCP)
- Google Analytics, Firebase, Jira, Figma, Visio, Confluence

PROFESSIONAL EXPERIENCE

SMB Operations Director

Doha, Qatar

Ooredoo Qatar

2014 – 2026

Ooredoo is a fast-paced multi-national corporation offering telecom, cloud, and ICT services in 13 countries with 100m subscribers.

PROCESS OPTIMIZATION

- Accelerated **revenue velocity by 20%** by re-engineering the omnichannel Lead-to-Cash (L2C) lifecycle; eliminated cross-functional bottlenecks and improved order accuracy through targeted automation.
- Modernized business processes using BPMN 2.0 (As-Is/To-Be) modeling and Value Stream Mapping (VSM) to identify and automate high-friction manual procedures.
- Engineered hybrid fulfillment architectures to auto provision core services (Mobile/FBB), use marketplace platform to activate SaaS (M365/GWS), while capturing complex orders manually seamless to customer.
- Uplifted net profit by 3% by optimizing scheduling of partners in delivering a $50M global network project.

DIGITAL TRANSFORMATION

- Reduced Customer Acquisition Cost (CAC) by 20% by spearheading the region's first B2B self-service portal and mobile app, shifting the acquisition model to a digital-first strategy.
- Orchestrated end-to-end product discovery via JAD sessions, stakeholder interviews, and system audits; defined epics and prioritized the MVP roadmap based on high-value business impact.
- Eliminated legacy product catalog complexities by designing a scalable, data-driven taxonomy using UML, significantly improving product discoverability and user adoption.
- Optimized Agile delivery cycles by leading sprint planning and backlog refinement. Achieved reduction in requirement volatility by enforcing INVEST-compliant user stories and rigorous Definition of Done (DoD).

DATA GOVERNANCE

- Executed a 100% integrity migration of legacy portal records using SQL and Power BI for gap analysis and data cleansing, ensuring a seamless transition to the new architecture.
- Architected an omnichannel data capture framework that synchronized CRM touchpoints, driving a 200% increase in outbound reach and providing field sales with a real-time "Single Source of Truth."

- Improved retention save-ratio by 18% through the development of predictive churn models that analyzed high-value triggers such as bill shock, technical friction, and usage patterns.

SALES ENABLEMENT

- Reduced agent onboarding ramp-up time by 50% by implementing B2B Sales Academy program and sales CMS.
- Transformed the mobile module of Oracle SFA into a mini-CRM delivering real-time visibility into customer locations, active service portfolios, support tickets, and generated leads to optimize field productivity

AI INTEGRATION

- Architected a secure RAG-based (Retrieval-Augmented Generation) AI chatbot integrating GPT-4o with CRM and regulatory tariff libraries to automate B2B inquiries and lead qualification.
- Designed backend API ecosystems using Swagger to integrate Oracle SFA and Siebel CRM, enabling real-time customer validation and automated lead tracking via Google Analytics/Firebase.

PRODUCT LED GROWTH

- Generated $400K in new revenue within 90 days by launching a disruptive data monetization and B2B2C platform built on "Compliance-by-Design" principles to navigate strict privacy regulations.
- Secured market share by developing a B2B2C platform for property managers to automate tenant service cycles, creating a "competitive moat" through a three-way value proposition.
- Spearheaded Sovereign Cloud productization across Azure, GCP, and AWS, streamlining the CX via consumption-based subscription plans for VMs and BaaS (Backup as a Service).
- Improved customer stickiness and ARPA by 5% by launching Value-Added Services (VAS) in partnership with industry leaders including Microsoft, Google, Cisco, Huawei, and NVIDIA.

Director, S&LG Accounts

Raleigh, NC

EDS, an HP Company

2009 – /2014

STAKEHOLDER MANAGEMENT

- Optimized P&L and operational delivery for a high-stakes portfolio of government contracts, achieving a **100% renewal and extension** rate through proactive risk mitigation and value-driven service delivery.
- Managed complex stakeholder landscapes, serving as the primary liaison between government entities and internal delivery teams to guide requirements and ensure 100% compliance.
- Led executive meetings presenting progress and contingency plans aligning milestones to objectives.

CROSS-FUNCTIONAL ALIGNMENT

- Orchestrated cross-functional onshore/offshore development teams to deliver bespoke software solutions, ensuring traceability from initial client requirements to final acceptance.

Systems Development Principal

Portland, OR

Saber Consulting

2002 – 2009

PRODUCT DEVELOPMENT

- Engineered a market-disruptive Voter Registration & Elections Management system in response to the HAVA Act of 2002 scaling **annual revenue 10x ($5.8M to $57.8M) in 4 years**, resulting in acquisition by EDS.
- Orchestrated large-scale **Joint Application Design (JAD) sessions across 13 states**, utilizing DSDM methodology for rapid prototyping and iterative feedback to ensure compliance and consensus.
- Transformed complex legislative mandates into functional specifications, bridging the gap between state-level policy requirements and technical execution to deliver user-centric agency portals.
- Architected a scalable, **parameter-driven product** design that reconciled diverse state-level requirements into a single, **modular COTS platform**, ensuring 100% regulatory compliance and requirement traceability.

DELIVERY GOVERNANCE

- Developed a repeatable implementation framework and standardized deployment playbook, significantly reducing technical risk and accelerating time-to-market across multiple complex jurisdictions.
- Led requirements elicitation and UX/UI design strategy for a diverse portfolio of Oregon state agency workflows, successfully migrating legacy manual processes into high-performance digital solutions.
